Jigsaw Blade Wood
T101AO - Clean Cut

Abracs ABT101AO Clean for Wood Jigsaw Blade is designed for clean, precise curved cuts in softwood and other non-abrasive woodworking materials. Made from tough High Carbon Steel (HCS), it features a pointed tooth design to minimise tear-out and ensure a smooth finish. The extra-fine tooth pitch is ideal for detailed cutting in materials ranging from 1.5–15mm thick, making it the perfect choice for intricate woodwork and fine joinery applications.

Features & Benefits

- Tapered teeth for fine, curved cutting
- Suitable for use on Softwood, Chipboards, Plywood & Fibreboards
- Bayonet (T-Shank) fitting system compatible with all popular brands of bayonet fitting machines
- Supplied in 5pc Packs
